EDUCATION

Codepath Web Development **(Fall 2026)**
Masters of Science in Electrical Engineering **(Graduated Fall 2025)**
University of Massachusetts Lowell, Lowell, MA | GPA: 4.0

- Power Systems, Gen AI, Digital Signal Processing, Linear Systems, Printed Electronics, Quantum Electronics

Bachelor of Science in Electrical Engineering **(Graduated Fall 2024)**
University of Massachusetts Lowell, Lowell, MA | GPA: 3.75

- Member, UMass Lowell Honors College & Dean's List, Eta Kappa Nu
- Eta Kappa Nu (HKN) Member
- Relevant Coursework: Circuit Theory I-II, Electronics I-II, Signals & Systems, Power Electronics, Linear Feedback, Logic Design, Microprocessor Systems, PCB Design, Electromagnetics, Data Communications.

Somerville High School, Somerville, MA (Graduated May 2021) | GPA: 4.4

TECHNICAL SKILLS

- **Tools & Equipment:** Oscilloscope, Function Generator, Breadboarding, Soldering, 3D Printing, High Voltage Machines
- **Software:** MATLAB, Arduino, Matplotlib, c++, Raspberry Pi, Multisim, LTspice, Qucs-s, Diptrace, Analog Discovery, PCB Design Altium 365, Kicad, Feather, Vagon, Ngspice. Microsoft Word, Excel, Outlook, Notepad, OneNote, PowerPoint, Quartus Prime, Winprep, Adobe, SolidWorks, Visio, Oracle Agile PLM.
- **Languages:** Fluent in English, Punjabi, Hindi

PROJECTS

- **VSCode Web Development** (Fall 2026)
- **Capstone Project** (Fall 2024): Developed a Lighted Wall Panel with 48 cells, controlled via Arduino and PCB design using Altium.
- **Digital Measuring Cup** (Spring 2024): Designed an Arduino-based liquid level indicator with LED/buzzer alerts using water level sensors and displays.
- **Butterworth Filter Design** (Fall 2023): Analyzed cutoff frequency using MATLAB; built and tested circuit with Multisim and Oscilloscope.
- **Electromagnetics Stub Matching** (Fall 2023): Used Smith Charts and CST Studio for double stub matching.
- **Traffic Light Arduino** (Fall 2021): Programmed traffic light system using Arduino and breadboard.

WORK EXPERIENCE

Electrical Engineering Intern/Co-op | Revvity, Hopkinton, MA (May - Sep 2024)

- Designed and modified PCBs for liquid handling systems (Janus/Fontus machines).
- Working with Mechanical, Manufacturing, Software, Computer, and Quality Engineers to successfully build and run a Janus machine.
- Collaborated with cross-functional teams to create Bill of Materials, test reports, and fabrication files.
- Troubleshot PCBs, created 3D models in SolidWorks, and rebranded company documents.
- Replacing and updating a PCB that operates inside one of the machines such as the Peripump.
- Create visual diagrams for PCBs using Visio, which is essential for tracking where each connection between one component and the other is being made.
- Programming PCBs using MPLABs IPE, using .hex binary code
- Replace PCBs inside of a machine, a process that requires a lot of safety and time as there are many connections and identical cables hooked together.

- Troubleshoot Winprep, the company's software used for running the Fontus and Janus machines.

Circuits II Lab Assistant | University of Massachusetts Lowell (Aug - Dec 2024)

- Graded lab reports, assisted students with lab equipment, and provided solutions to circuit problems.

AI Trainer & STEM Subject Matter Expert (Freelance) | Outlier AI, Remote (Apr 2026 - Present)

- Evaluated and processed large language model (LLM) outputs, for any particular subject.
- Generated training data using Supervised Fine-Tuning (SFT) to improve model responses and reasoning.

AI Trainer (Contract) | Handshake AI (Jun 2026 - Jul 2026)

- Evaluated and tested Generative AI models specializing in circuit design and simulation.
- Designed complex tech prompts to test LLM design capabilities.
- Executed and reviewed peer-designed workflows, acting as an evaluator to validate circuits.
- Used KiCad, LTspice, NGspice, and SparkPCB to verify schematics and simulations.
- Conducted research to support prompt development and certain tasks
- Analyzed model outputs for accuracy, clarity, and depth in subfields

Crew Member | Dunkin' Donuts, Somerville, MA (Nov 2020 - Present)

- Provided customer service, processed transactions, and maintained a clean and efficient work environment.

AWARDS & HONORS

- Somerville High School Community Scholarship (2021)
- UMass Lowell Dean's List & Scholarships (2021 - Present)
- Eta Kappa Nu Award (Fall 2024)

CERTIFICATIONS

- Claude Code 101 Certification (Jul 2026)
- IEEE - Eta Kappa Nu Certification (Nov 2024)
- Real Estate Salesperson's License (Aug 2023)

COMMUNITY SERVICE

- **Connexion**, Somerville, MA (Nov 2019 - Mar 2020): Assisted with public meal distributions.
- **East Somerville Main Streets**, Somerville, MA (Fall 2019): Volunteered at local events.

CLUBS & ORGANIZATIONS

- Robotics, Math & Science League, Community Service
- **Let's Get Ready** (Summer 2019): College prep mentorship.
